

TRACTORS THAT HAVE BUILT A LEGEND.

than maneuvering the family station wagon.

FRONTWARD OR BACKWARD, IN AN INSTANT

Whatever gear you're in, you can move to forward or reverse instantly. Control like this makes it easy to get in and out of any place. All you do is move a lever, your foot relaxes. And all controls are as close as your fingertips.

What all this adds up to is an extremely agile tractor that works in snug spaces as well as in open ones. It also adds up to a tractor you'll spend a lot of time with.

THINGS ARE TOUGH ALL OVER

To last a long time, Gravely tractors are built to be tough from the inside out. The transmission housing is made of cast iron. And that's about as

tough as you can get.

The rear-mounted engine is bolted directly to the transmission housing. A design that gives you extra traction and a low center of gravity.

With a choice of various ground speeds, you get the right speed for the job.

START YOUR OWN LEGEND

So instead of just looking at them in this catalog, ask

somebody who's been working with one for a few years or for a lot of years. Because anyone who owns a Gravely lawn and garden tractor just wouldn't let anything else on their lawn and garden.

Then ask your dealer to let you try your hand at one of our legendary Gravelys. We think you'll be sold.
