

If you want to get more out of your garden, put a Gravely in it. Our convertible tractors power a number of garden tools that make your garden much more productive. And working in it more fun.

ROTARY PLOW

Ours is the only rotary plow attachment made that gives you a perfect seedbed in just one pass. The four whirling blades cut up, turn and blend the soil into a seedbed that's ready to plant.

You can plow up to 7" deep with furrows up to 10" wide, depending upon the soil conditions. All-gear drive without any belts powers the heavy-duty, forged-steel blades. The plow will move aside rocks and obstacles the size of your fist, while the slip clutch in the tractor helps protect both attachment and tractor from larger obstacles. The right angle bevel gear drive with tapered roller bearings is fully enclosed in a cast iron housing.

When you've finished

Top: Gravely 5260, 8 hp Convertible Tractor with All-Gear Drive Rotary Plow.
Bottom: Gravely 5260, 8 hp Convertible Tractor with All-Steel Hauling Cart.

plowing, you can use your rotary plow for terracing, hilling and even ditching.

ALL-STEEL HAULING CART

Whatever needs moving, the Gravely hauling cart can move it easily.

Not only is it one of the most useful attachments, it's one of the strongest.

It can carry three or four bales of straw or peat moss. Or, fill it with soil or compost. Bricks, cement bags ladders. Even the kitchen sink.

Hitch it up with the swift-action pin connection. The tailgate is removable, and a pull on the positive latching dump lever releases the body for easy dumping. Heavy gauge steel construction, sleeve bearings, strong axle and pneumatic tires mean long years of smooth rolling service.

So, whether you're fixing up or just cleaning up, the Gravely cart is one of the most useful attachments you can invest in.
