THE DEALER

He's the one person who can help you match up the lawn and garden equipment you'll need for your lawn and garden. And your Gravely dealer's been keeping his customers satisfied for a long time.

SERVICE

Like any piece of fine machinery, a Gravely tractor needs to be serviced periodically. Your Gravely dealer stocks Gravely factory parts and he also has Gravely-trained mechanics on hand to do the job. So with regular maintenance, long tractor life becomes a way of life.

THE COMPANY

Since 1923, we've been building, selling and servicing equipment for lawns and gardens. And since lawn and garden equipment is our only business, we've become

exceptionally good at it. To a point where our tractors have become legends in their own time.

Gravely headquarters and manufacturing facility at Clemmons, North Carolina.

That's why, when you buy a Gravely tractor, you probably won't want to replace it. And as well as it's built, you probably won't have to.

DEMONSTRATION

The best way to find out how well a Gravely tractor will work on your land is to drive one on land like yours. Your Gravely dealer is glad to arrange demonstrations. We think once you test drive a Gravely, you won't want to drive anything else.
