LOVE THAT POWER!

A rear-mounted Gravely 10HP engine powers you easily up the steepest hills . . . gives you full lugging power for plowing, bulldozing, heavy mowing and all other gardening and grounds maintenance jobs.

fun machine

LOVE THAT ALL-GEAR DRIVE!

No belts to tangle or break. Gravely's drive is all-gear and steel shaft . . . right through to the attachments. The power goes right where the job is done. Four speeds forward . . . four reverse . . . without clutching!

StevenChalmers.com

LOVE THOSE ATTACHMENTS!

The Gravely 424 is a versatile powerhouse . . . with attachments that mount up front, down under or trailing. They go on easily and receive full power from the all-gear drive.

StevenChalmers.com

LOVE THAT REAR- MOUNTED ENGINE!

Putting the engine in the rear means unequalled stability on slopes . . . super traction that makes any cutting job easier. You ride smoothly, effortlessly through work that is no longer work. That's why we call it the fun machine . . . and why you'll call it the riding tractor you've been waiting for.
